

About Us

Broad Stone Cast Products is a manufacturer of architectural cast stone dressings, supplying major Plc building contractors, national and independent builders merchants.

We're run as a small friendly family business and pride ourselves on giving an overriding attention to detail and customer requirements. Whilst specialising in ornate and profiled bespoke designs, we have a large selection of standard profiles which can satisfy the designers demands.

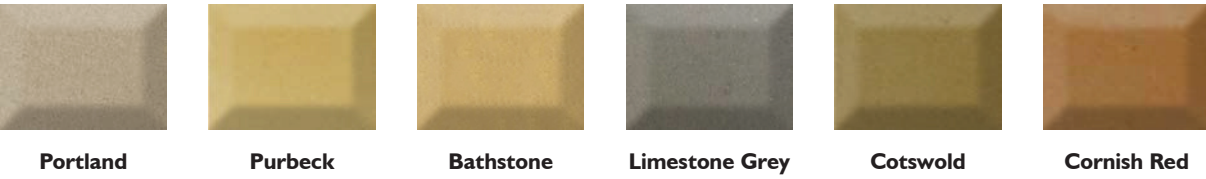

Our cast stone is manufactured by hand by means of a semi-dry mix of aggregates, cement, waterproofer and pigments which is compacted into either timber, steel or fibreglass moulds. Once complete, the unit is immediately demoulded and left to cure. The finish is smooth with a similar performance and appearance of natural stone.

Further Dressings

Colours

Our Dorset sourced aggregates give a very similar look to natural Portland limestone. Below are the standard range of colours, which will suit most requirements. Talk to us, if there's something a little different you need.

The above colours are indicative and are representative of the manufactured cast stone. Samples are available on request.
